

Propane conversion kits
for small engines

THE SMART ALTERNATIVE
TO GASOLINE

WORKS ON ENGINES FROM 1 TO 45 HORSEPOWER
EASY TO INSTALL
BETTER PERFORMANCE
LESS MAINTENANCE

AltFuel Green conversion kits retrofit 4 stroke carbureted gasoline engines to run on clean, safe, and efficient propane fuel.

Benefits of converting to propane

- Earth friendly alternative to gasoline
- Non-toxic exhaust
- Increased engine life and lower maintenance
- Improved engine performance
- Significantly reduces air pollution
- Simple and easy conversion kit

Stop polluting with gasoline

- 5% of air pollution is from small gas engines
- 1 hour of gas engine use=350 auto miles
- 1 gas engine creates 87lbs of CO2
- Over 700 million gallons of gas spilled
- Life threatening exhaust
- Increased wear and tear on engine

RESIDENTIAL OR COMMERCIAL USAGE COMPONENTS

Residential Use: 1-19Hp these residential units will need to use an Intake adapter, Residential Fuel supply line, and a Residential Attachment line.

Commercial Use: Engines 20-45Hp with a Canister filtration air filter assembly are automatically categorized as a Commercial unit. These Commercial units will need to use an Intake Adapter, Intake Restrictor, Commercial Fuel supply lines, and Commercial Attachment lines.
