

## New EGGcessory EGG Genius

Interactive Temperature Controller

The EGG Genius effortlessly controls the temperature of your EGG through your smartphone, tablet or computer. Remotely manage and monitor cooking temperatures for worry-free cooking, monitor the temperature of your food, view graphs of your cooks ... and even receive alerts when your cook is finished or when the EGG temperature is too high or low.

### Remote control for your Big Green Egg!

- Control the device through your smartphone, tablet or computer to remotely manage and monitor the internal temperature of the EGG
- Monitor the temperature of your food; view graphs of your cooks
- Receive alerts when your cook is finished or when the EGG temperature is too high or low
- Quickly and easily reach your desired cooking temperature as the blower ramps up to fan the lighted charcoal; once the desired temp is reached, the variable speed blower automatically adjusts the blower speed to optimize the set temperature.
- Automatically lowers the pit temperature to keep your food warm when the cook is complete.
- Detects the sudden temperature drop from opening the dome and turns the fan off temporarily to avoid over-stoking the fire.
- In the case of a power outage, the unit continues running at the saved set temperature and reconnects to the WiFi network automatically when power returns.
- One Year Limited Warranty

WiFi  
Enabled

**FLAME BOSS®**  
POWERED BY FLAME BOSS®

- Includes 2 industrial-duty thermometer probes (1 meat probe & 1 pit probe) for accurate readings to 500°F/260°C.
